REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a coding device for encoding data. Prior art references show similar methods but fail to teach: **"wherein the receiver takes multiple samples during each clock period to track the dynamic variation in the temporal or amplitude thresholds of the data to improve the overall coding efficiency"**, as in claims 1, 15, 16, 21; **"a code table created to introduce a DC balanced signal and containing two parts of codes, one part for coding symbols with negative current disparity, and another part for coding symbols with positive current disparity. the table being such that: each input symbol corresponds to two codes. one code being from the first part of the table and the second code being from the second part; codes presented in both parts of the table shall be assigned to the same input symbol; within each code presented in the part of the table for negative current disparity, the sum of "1"s is equal to 8 or 9; within each code presented in the part of the table for positive current disparity, the sum of "1"s is equal to 7 or 8; the current disparity is negative when the previous code has 9 or 8 "1"s; and the previous state of disparity was negative"**, as in claim 18; **"the samples taken by the receiver are spread in time around a regular sampling clock that enables the dynamic shift in the received data to be tracked by matching shifts in the sampling clock or inverse shifts in delay circuitry within the receiver"**, as in claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
